

**Announcement from Rajamangala University of Technology Srivijaya
on Sustainable Consumption and Production
A.D. 2022**

RUTS has a policy and goals for sustainable development, aiming to achieve the Sustainable Development Goals (SDGs) set forth by the United Nations. This is pursued through policies and action plans aimed at developing the organization and related units, in response to the needs of the current generation. The university has therefore established the following policies:

1. The promotion of ethics and innovation in food production and related aspects within the university and its associated sectors is a key policy, particularly focusing on food safety, resource conservation, and waste reduction.
2. Establishing processes and practical guidelines to reduce the use of single-use packaging and non-biodegradable waste, such as plastics.
3. Reducing the use of essential or minimal plastic packaging and plastic bottles, while also avoiding excessive and unnecessary plastic consumption.
4. Supporting and promoting ethical practices in food production and consumption across all university-related entities and dimensions.

Rajamangala University of Technology Srivijaya is dedicated to advocating for and supporting various initiatives aimed at enhancing sustainable consumption and production in order to achieve the objectives outlined in the aforementioned policy consistently and sustainably.

As a result, this announcement is made to inform every one of our commitment and intentions.

Announced on February 1, 2022

(Prof. Dr. Suwat Tanyaros)

President of Rajamangala University of Technology Srivijaya
